Claims 1-3,6-10,12-21,26-28,31-35 and 37-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maryanoff et al. It discloses the instant 2 step process using THF or TBME as solvents for both of the steps. Applicants claim the same process except that they are excluded as solvents and because applicants recite that their process is continuous. However it is considered obvious to use other common solvents including glycol-dimethyl ether, i.e. glyme, (see claim 6) for both steps in view of Maryanoff's teachings. Conversion of known process to a continuous one is obvious. See In re Dilnot 138 USPQ 248 and In re Lincoln 53 USPQ 40.
